Professional experience

Code Flick

03/2024 – present

- Write clean, scalable, and maintainable code using Asp.net Core
- Implement and maintain existing Application Database
- Integrate third-party components and services
- Deploy applications to production environments
- Provide ongoing maintenance, support, and enhancements to existing applications
- Investigate and resolve issues reported by users

Behira Head Office | Pahse 8, Rawalpindi Pakistan

01/2024 – 03/2024

- Collaborate with senior developers to design, code, test, and debug software applications using C# and the .NET framework.
- Understand new requirements and transform them into functional applications in line with business objectives.
- Maintain and upgrade existing applications and fix issues.
- Work on the development and maintenance of web applications, ensuring responsiveness and optimal performance.
- Troubleshoot and debug issues, providing timely resolutions to reported problems.
- Collaborate with the QA team to conduct thorough testing of applications, identifying and addressing any bugs or issues.
- Rewriting/making changes in existing code structure to increase efficiency and performance.

Projects

Insight Academy

- Business website developed using **clean architecture** and **code-first** approach with **ASP.NET C#, MVC, .NET, Bootstrap, HTML, CSS, and jQuery**.
- *Connects students with tutors, allowing tutors to register and create detailed profiles.*
- *Students can view tutor profiles, filter by subject, and directly message tutors via SignalR for tutoring sessions.*
- *Tutors can create, update, and delete their profiles, upload introduction videos, and categorize themselves by subjects.*
- *Supports email verification and password recovery.*
- *Students can manage profiles, rate tutors, bookmark favorite tutors, and add tutors to a wishlist.*

- *Administrators can monitor activities of both students and tutors, engage in chat conversations, and block or unblock users.*

SanamEvents

- E-commerce website developed using **clean architecture** and **code-first** approach with **ASP.NET C#, MVC, .NET, Bootstrap, HTML, CSS, and jQuery**.
- Specializes in birthday themes, allowing customers to browse themes, make bookings, and complete transactions securely through **Stripe payment gateway** integration.
- Utilizes **Google Location API** to help customers select venues based on their location.
- Administrators can add new themes and addons, view recent orders, download order receipts, monitor upcoming events via a calendar, and check the payment status of orders.

UQ Immigration

- Business website developed using **N-Tier** and **code-first approach**.
- Designed for a lawyer specializing in immigration services.
- Provides detailed information on various immigration solutions.
- Enables customers to schedule, edit, or delete appointments directly through the website for seamless booking.
- **SMTP** (Simple Mail Transfer Protocol) email functionality sends confirmation emails to both the customer and the lawyer upon appointment booking.
- Facilitates easy management of appointments and services by the lawyer.
- Currently in its initial stages, aiming to provide a user-friendly experience for clients to easily access information and interact with the lawyer's services online.
